

## Strengthen Courthouse Security with the WAVE

*“Emergency in Courtroom One!”*

The WAVE is flexible and cost effective. When wireless sensors are triggered, the WAVE transmits a pre-recorded alarm over your existing radio network. Officers can react immediately without any dispatch delay.

With no wires to run through walls, wireless panic buttons and other sensors can be installed easily in the courtroom, judges' chambers, offices, law library, etc.

The WAVE system can be easily integrated into existing security equipment to add value to your overall security solution. Officers are free to patrol the courthouse yet still respond effectively when needed.

### System Features:

- Transmits unique, detailed, customized messages to all hand-held radios and base stations in the radio network
- Messages are easily added or changed by end users
- Includes hard wired input and output relays which can be assigned to zones to trigger other devices
- Can send emails and/or text messages
- Compatible with a wide variety of sensors, including panic buttons, tilt switches, door/window contacts and motion detectors
- Sensors can be scheduled to be on or off during specified hours based on a customized schedule
- Compatible with VHF, UHF, 800 MHz or any other commercially available frequency
- Battery backup included
- Two year warranty included

*Add wireless panic buttons to your security system and get instant, pinpointed notification of emergencies*
