The portable WAVE is a flexible wireless instant notification system that can be used for a wide variety of field applications including covert surveillance or executive protection.

When panic buttons, motion detectors or other wireless sensors are triggered, the WAVE transmits a detailed message over your radio network specifying the location and nature of the emergency. First responders can react immediately and effectively without any dispatch delay.

The portable WAVE is easy to set-up in any location. It is a discrete and effective way to provide protection for people and assets.

“Unauthorized Access Detected in the South Hallway”

System Features:

- The portable WAVE is packaged in an impact resistant case.
- Detailed messages can be recorded on the portable WAVE and assigned to different sensors.
- Messages are easy to change.
- Messages are transmitted to all radios and base stations on your radio network or to a specified call-group.
- A wide variety of sensors are available.
- Sensors can be activated on a customized schedule.
- The WAVE is compatible with VHF, UHF, 800 MHz, digital or any other commercially available radio frequency.
- The portable WAVE can be plugged into a standard electrical outlet or can function on its battery for up to three days.
- Two year warranty provided .

Add wireless panic buttons to your security system and get instant, pinpointed notification of emergencies
