

## THE WORLD OF WIRELESS

WHY DIGITAL TWO-WAY  
**MOTOTRBO™****New MOTOTRBO Features**

The MOTOTRBO professional digital radio solution now has even more features to help improve your business productivity. With expanded coverage via IP Site Connect, remote management functionality, enhanced privacy and multiple channel capability, tomorrow's most advanced digital radio is here today, right in the palm of your hand.

**Additional MOTOTRBO Functionality**

- Through an exclusive, patent-pending technology, Motorola's IMPRES accessory portfolio enables improved communication between the radio and associated accessories
- Capacity Plus is a single-site trunking solution that increases the number of users on your MOTOTRBO system
- The MOTOTRBO Text Messaging Service provides communication between radios and dispatch systems, between radios and email-addressable devices, and to remote PC clients attached to radios
- MOTOTRBO features an integrated GPS module that, in conjunction with a location software application, gives you the ability to track both people and assets – without cumbersome external GPS devices to install and maintain.

Please see our website for more information on [MOTOTRBO Features and Functionality](#)

**ATTENTION!!!** Wireless C&E will be attending the 2009 Greater Philadelphia Building and Facility Maintenance Show on October 21st and 22nd with some great giveaways and prizes. Please register and stop by - [Click here to Register to Attend!](#)

**Whelen Customized**

Wireless Communications & Electronics, Inc. is a full service communications provider. If you have an issue or problem, we have the engineers and technicians to help you. We can provide solutions and custom tailor any product to meet your needs.

This month we are highlighting a new product that we designed, engineered and created for one of our current customers. This product, the RM177G, is a remotely activated strobe system that can be AC, battery or solar powered. This particular product works in conjunction with the Whelen Emergency Mass Notification System which is an outdoor siren alarm. It can be utilized in high noise or no noise environments. Military bases, chemical plants, airports, colleges, manufacturing facilities and hazardous material environments may also benefit from this product. This product is 100% customizable to meet your needs.

**Questions? Please contact our Whelen specialist —Jim Cassidy at [jcassidy@wirelessce.com](mailto:jcassidy@wirelessce.com)**

**TECH CORNER**

Did you know that all of our service centers are turn-key solution providers that offer custom products and installations?

Please call the service center in your area to speak to our highly trained, certified engineers and technicians!

**Quote of the Quarter**

"Wireless had the NICE Logger up and working - It was amazing!"

- Kathy Huffard, Communications Supervisor - Ocean City Police

Wireless Communications and Electronics, Inc. is the leading provider of mission critical communication systems. However, we also recognize that what happens after your emergency is as important as the emergency itself.

Providing the ability to record audio, data, or video is one of the ways we assist our customers in being as successful as possible.

**Solutions of the NICE Call Focus III Include:**

- Scenario Replay – The industry's best multi-channel search, replay, and incident reconstruction tool
- NiceLog – A state-of-the-art high density recording platform, with up to 480 channels in a single chassis
- Trunked Radio Solutions – Certified solutions to record audio and data from the leading trunked radio providers
- NiceStorage Center – A powerful centralized archive tool with selective retention and unlimited capacity
- NiceLog Voice over IP (VoIP) – Certified software only, or hardware + software solutions
- Last Message Replay – Rapid, single-click access to recent transmissions for call takers and dispatchers
- Dispatcher Assessment – A powerful tool to automate the quality process
